Bee Coloring Sheet

Use color to complete the picture.

Worker bees venture out of their hives to gather pollen and nectar from various flowers. While doing so, they collect nectar with their long tongues and pollen sticks to their bodies. As they move from plant to plant, bees also help spread pollen, which is essential for plant growth.

Bee Coloring Sheet

Use color to complete the picture.

Worker bees bring pollen and nectar back to the hive. Pollen is an important protein source for the bees, while nectar serves as an energy source for the colony. The bees transform the nectar into honey by passing it from bee to bee. Finally, the honey is stored in honeycombs for later consumption.
